

WEST COAST SEA KAYAKER
Newsletter of the West Coast Sea Kayak Club
April 1997. Issue 2.

Hello again, we hope you are all still keen on starting up with the new sea kayak club. Things are happening more people are hearing about us and we are contacting anyone we know with a sea kayak. The club is on a roll. We are going to organise a few paddling trips and other events for the group to get together. The actual organising of the club is a bit time consuming and will take a while. A constitution is being looked at, and a set of aims and rules will be formulated.

Firstly, you should be happy that most of those involved so far do not want a club that is beuoratic, stuffy or simply a pain in the bum, our air is to have a group of sea kayakers who are interested in getting together for a paddle.

WHAT CAN YOU DO?

Well you can start by coming along to one or more of the events listed. You can spread the word to fellow kayakers. You can get registered or at least on the mailing list. You can tell us what your ideas are. Just be involved.

WHAT NEXT?

We want your ideas, suggestions and requests. For instance we need to agree on a name for the club. We have organised a meeting to formalise the club on Thursday May 1st at John and Fran's place, 12 Elvire St, Waterman. 7pm. Come along, get involved.

AIMS OF THE CLUB

The club is for sea kayaks. We believe on our club meets we all should attend in our sea kayaks. There are plenty of other clubs where you can use your other kayaks, but for the purpose of our meetings and to attract other sea kayakers, it looks great to see a flotilla of SEA KAYAKS.

The aim of the club is to be professional and to encourage safety and compliance with the rules and regulations that concern the sport, while at the same time not forgetting the main aim is to enjoy ourselves on the water.

PENGUIN ISLAND TRIP

Great roll up and the start of even better and bigger trips. Thanks to the more experienced guys, Andrew, Alwyn Duke and John Di Nucci, some of us novices landed the right way up on a beach landing and learnt some techniques to use in the waves or over reefs etc. Thanks for sharing your wealth of knowledge and skills with us.

That's all for now. CALENDAR OF EVENTS HEREWITH.
